

# FULL RESPONSE®

An original design and creation of Jim Kirvida, the Full Response® cab revolutionized the fire industry. Prior to the Full Response® pumper, firefighters were riding in open cabs and 4 door Louisville "sedan" cabs. By combining the pump system, preconnect hose lays, and passenger seating into a quiet, safe and comfortable cab, CustomFIRE changed the face of the fire service. Today, there are numerous knock-offs. None of them match the design, safety, reliability, and quality of the original Full Response® cab.
